

### **Course Description:**

This lecture and hands on workshop course is intended for generalist and specialists alike that want to understand the many different modalities of stent fabrication and their uses. From the simple screw access hole guide, to the more complex CT driven guides, this course will familiarize you with every step needed to be well informed.

### **Requirements for Attendance:**

Participants are encouraged to bring to class 3 actual ( real cases )study casts made with very accurate PVS impression material. Also, each case should have their respective x-rays and treatment plan proposal for group discussion.

### **Course Agenda:**

8:00 am - Registration

8:45 am - Introduction

9:00 am - Science on radiographic & surgical guides

10:00 am - Steps to fabricate Radiographic guides

10:30 am - Steps to fabricate surgical guides

Break

11:00 am - Diagnostic work up of casts (Set Ups)

12:00 am - 1:30 pm - Lunch Break

1:45 pm - Hands on workshop - Fabrication

Radiographic Guides

Simple Surgical Guides

Complex Surgical Guides

4:30 pm - Conclusion & Wrap Up

### **Course Location:**

International Dental Education Continuums, Inc.

8740 N. Kendall Drive Suite 215 Miami, FL 33176

Registration Call at: 1-800-634-0525

# FABRICATION OF RADIOGRAPHIC AND SURGICAL GUIDE STENTS

April 10th 2009

## Objectives:

By the end of this course, the participant should be able to:

- Accurately and correctly design and produce radiographic and surgical guides for implant dentistry.
- Determine the best type of appliance for each situation.
- Determine the best type of material to use for each appliance.
- Convert the radiographic appliances into surgical appliances.
- Identify the differences in simple and CT appliances
- Identify the similarities and differences in the major implant planning software.

Tuition: \$ 595 per Doctor & \$ 295 per Assistant
